

HYGIE DIVIDER

Setting up a dividing screen has never been easier thanks to the HYGIE Divider!

The HYGIE divider blocks the spread of droplets to support social distancing efforts in a professional context.

This divider is light, very stable and fast to setup/remove, making it the perfect solution for travelling business people.

MADE IN FRANCE

A DIVIDER SUITED TO ALL SITUATIONS

Support your social distancing efforts in all contexts: at your company reception, at meetings, in canteens or even in open space.

The stability of the HYGIE divider makes it highly adaptable for all surfaces (office, counter, table, etc.). It is also easy to move thanks to its light weight.

The placing of the feet means that in an office setting the divider can extend over the edge of tables for increased protection at workstations.

RECEPTION

IN OPEN SPACE

IN CANTEENS

AT MEETINGS

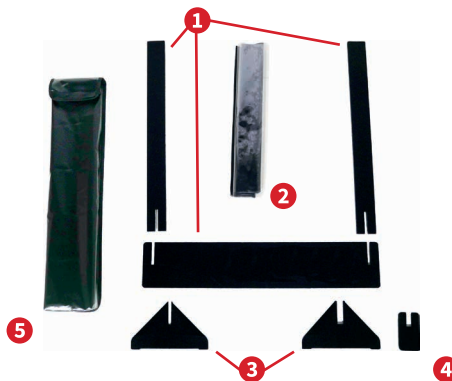

User guide and assembly instructions included.

FAST INSTALLATION WITHOUT TOOLS OR SCREWS

Easily assemble or remove the divider in just a few seconds.
